Surface SWYPE for Aliphatic Amines Cat. No. 769-1025 Operating Instructions

Limited shelf-life: *Check expiration date on packaging.*

1. Lightly spray the area or item (e.g., workbench, tool, control knob) with Developing Solution for Aliphatic Amines Cat. No. 769-1065.
2. Wait at least 30 seconds and then wipe with a Surface SWYPE pad.
3. Allow 3 minutes for the color to develop on the pad. A fuchsia color indicates that aliphatic amines may be present. This color reaction relies on detecting the alkaline pH of aliphatic amines.
