

## BioSampler Case with Mounting Rod Operating Instructions

## **Assembly**

- Remove nylon harness, clip (with thumbscrew), and mounting rod from case (mounting rod is between back of foam insert and back of case).
- Slide large end of mounting rod through the larger loop on the nylon harness until the harness loop rests in the indentation on the mounting rod.
- 3. Slide the small end of the mounting rod into the small hole on the clip.
- 4. Tighten the thumbscrew.
- 5. Screw threaded end of mounting rod into the semi-circular hub on top of the case.
- 6. Place BioSampler (assembled) into the indentation in the hub.
- Loosen the thumbscrew on the clip and place clip indentation around the BioSampler nozzle. Tighten the thumbscrew.
- 8. Wrap nylon harness around the BioSampler and secure Velcro fastener.

## Disassembly

- 1. Remove BioSampler and unscrew mounting rod.
- Remove nylon harness.
- 3. Loosen the thumbscrew and remove clip.
- 3. Place nylon harness and clip in the back, right foam compartment.
- Place the mounting rod between the back of the foam insert and the back of the case.

**Caution:** Failure to replace parts in the proper foam compartments will cause distortion to the inside of the carry case and reduce its ability to protect glass components.
